# Site Plan Review Checklist

Please check the following list to make sure that you have included all applicable information.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| ☐ | Submit projected daily wastewater discharge flow calculations (average, maximum). Include description of discharge source and any potential contaminatees.  
  Note: Flow monitoring of the public sanitary sewer and capacity analysis of existing and proposed sewage flow may be required – please contact WPCA |
| ☐ | Submit size and quantity of existing and proposed water meter(s) for the project.  
  Note: Please provide copies of latest water bill and any local water department signoffs. |
| ☐ | Confirm if there will be any temporary discharge to the sanitary sewer or any other dewatering activities to the sanitary sewer during construction.  
  ▪ If applicable, submit State of Connecticut Department of Energy and Environmental Protection discharge permit application. |
| ☐ | Confirm if there will be any temporary bypass of sanitary sewage during construction |
| ☐ | Food Preparation Establishment (Class 2, 3 and 4), if applicable, submit the following:  
  ▪ Identify size and location of grease recovery units  
  ▪ Include grease recovery unit details (cut sheets / shop drawings)  
  ▪ Include floor plumbing and grease waste lines and invert elevations on drawings  
  ▪ Provide equipment schedule on drawings  
  Note: Information assistance can be found in the WPCA’s FOG Program packet – please contact WPCA |
| ☐ | Oil/water separator (existing/proposed) onsite for garage/floor drains to sanitary sewer, if applicable, submit the following:  
  ▪ Identify size and location of oil/water separator  
  ▪ Include oil/water separator details (cut sheets / shop drawings)  
  ▪ Include all plumbing to/from oil/water separator on drawings |
